

## **Medical Equipment: - Role and responsibilities in the NGO world**

**Yadin David**—Dr. David provides expert services in planning, assessment, and improvement of healthcare technology life cycle management as Biomedical Engineering Consultants, LLC, ([www.BiomedEng.com](http://www.BiomedEng.com)).

Previously, Dr. David headed the comprehensive Biomedical Engineering department and the Center for TeleHealth at the largest medical center in the country, twice winning ECRI Institute Technology Integration and Customer Service awards. He holds academic appointments at Baylor College of Medicine and the University of Texas, School of Public Health. He serves on the FDA advisory panel and is the recipient of the FDA commissioner's special citation and of the ACCE/AAMI Robert L. Morris International Humanitarian award. Dr. David founded the American College of Clinical Engineering and the not-for-profit Healthcare Technology Foundation.

Dr. David serves as advisor to the Pan American Health Organization (PAHO) and the World Health Organization (WHO) where he globally teaches technology management. Dr. David presently serves as the chairman of the Clinical Engineering division of the International Federation of Medical and Biological Engineering (IFMBE). He authored numerous manuscripts, chapters and books including Clinical Engineering by CRC Press. Dr. David is registered Professional engineer, certified Clinical engineer and diplomat of the American Forensic engineering and technology.
